
PredictionService
- _engine, _confidence_calculator
- _threat_scorer, _explainer
+ predict(request): PredictionResult
PredictionExplainer
- config: ExplainerConfig
+ explain(estimator, features, tokens)
InferenceEngine
- _registry: ModelRegistry
- _preprocessor, _vectorizer
- _estimator, _version_info
+ load() + reload()
+ predict(raw_text)
+ transform(raw_text)
ThreatScorer
- _config: ThreatScoreConfig
+ intents(raw_text)
+ assess(probability, tokens, raw_text)
ConfidenceCalculator
- config: ConfidenceConfig
+ calculate(scam_probability)
ModelRegistry
versioned model and vectorizer files
+ register() + promote()
+ get_production(name)
+ list_versions(name)
TextPreprocessingPipeline
cleaner + tokenizer
applies the same steps in training and in serving
TfidfFeatureExtractor
word and character n-grams
+ fit() + transform(texts)
