Collect sources: IMC 2025 India subset, India SMS, 2025–26 advisories, team SMS, synthetic templates
Normalise anonymised entities and mask personal data
Group near-duplicates into campaigns (MinHash LSH)
Audit labels: rule-confirmed, manual review, second pass on model disagreements
Split by campaign: train / development / test
Preprocess: clean, tokenise (Latin + Devanagari)
TF-IDF word + character features; train classifiers
Select model on development split; evaluate on test
Register the trained model; serve with intent rules and explanations
Deploy web application; daily live-site check
